

R20

The roaster has a capacity of 20 kilograms of green coffee and can perform new roasts simultaneously with cooling. The machine is driven by 4 electric motors, and can roast with propane or natural gas. The green bean loader (pneumatic conveying unit) and chaff collector are standard equipment come together with machine. This roaster has an external chaff collector, providing safe, efficient and quick chaff removal. (Prevention for fire.)

STANDARD FEATURES & EQUIPMENT

- Sampling spoon and sight glass
- 20 kg batch capacity
- Multiple temperature gauges – separate drum, bean and exhaust temperature (3rd gauge is optional)
- Stand-alone chaff collector
- Simultaneous roasting and cooling
- High capacity cooling system
- Temperature controller
- Installation, startup and user's manual

Batch capacity : 20kg
 Roasting time : 11-17 minutes
 insulation : R5 has the best insulation for stable roasting and cost saving
 inverter : Motors are driven by inverter to avoid problem in case of any electrical abnormality
 3phase motors run with single phase electricity for long lasting motors

R20

Audible Warning : Audible warning when it reaches to set temperatures.
Electrical parts : Most famous brands with best quality.
Safety : CE certified gas blocker, and inverter.
Quiet run : Quite run allow to listen beans cracks not motors.

TECHNICAL SPECIFICATIONS

Batch Capacity : 20kg
Dimensions (cm) : 140x200x180cm
Weight : 600kg
Voltage : 110/220/380V
Frequency : 50 - 60 Hz
Heat source : LPG - NG
Motors : 4

OPTIONS

Stainless steel, Copper or Brass plated body
Roasting profiler, easy to connect your pc
PLC touch screen control

Gas Blocker cut the gas on the line incase of abnormaly on pressure.

Coffee Roasters made by Roaster&Roaster has powerful 380V electric motors. Thanks to the electric inverter; the value of electricity could be changed to (110V-220V-380V / 50-60 Hz). Moreover, the systems ensures high durability, longevity and silent operations.

Coffee roasting machines are offered by optional PLC (Programmable Logic Controller) to our customers. User can remote the coffee roaster throughout Wi-Fi connection. By user tablet, pc or smart mobile, user can control remotely the roasting machine and data examination from all over the world. Coffee Bean Roaster machines produced by Roaster&Roaster are full-compatible for legislations of all countries. We are able to customize our products according to your requests.
